

The world economy has turned out to be a much more dangerous place than we imagined.

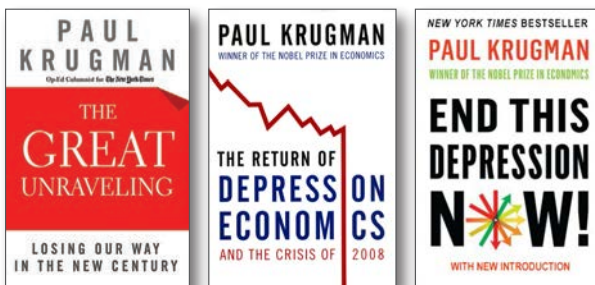

Paul Krugman

Professor of Economics and Distinguished Scholar at The Graduate Center, City University of New York.

Winner of the 2008 Nobel Prize in Economics. 2011 Gerald Loeb Award winner for Commentary – New York Times.

One of the world's foremost economists. A gifted observer and contributor on policy and economics. Committed to speaking the truth as he sees it in the most compelling terms. Insightful, outspoken, passionate and articulate. Author, *End This Depression Now!*, *The Great Unraveling* and *The Return of Depression Economics and the Crisis of 2008*.

Paul Krugman

Professor of Economics and Distinguished Scholar at The Graduate Center, City University of New York.

As one of the world's best known and most acclaimed economists, Paul speaks on the leading issues of the day affecting the world economy. An insightful, outspoken Op-Ed columnist for *The New York Times*, he is a passionate and articulate speaker, with a gift for relating global economic events to his audiences, and committed to speaking the truth as he sees it in the most compelling terms.

His twice-weekly Op-Ed pieces for *The New York Times* model the depth of insight and the unflinchingly outspoken style he brings to his speeches.

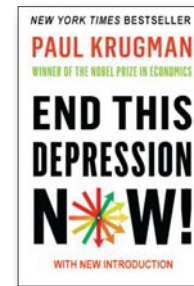

The author of several books, Professor Krugman's most recent, *End This Depression Now!*, is a call for action. In it, Paul has a powerful message for anyone who has suffered during the Great Recession—a quick, strong recovery is just one step away, if our leaders can find the “intellectual clarity and political will” to end this depression now.

His previous books include *The Conscience of a Liberal*, *The Great Unraveling*, a bestseller, and *The Return of Depression Economics and the Crisis of 2008*, a response to the financial crisis, an updated edition of his 1999 book, *The Return of Depression Economics*.

In addition to the Nobel Prize, Krugman's work in economics has earned him broad acclaim from the economic press and several prestigious awards, including the John Bates Clark medal from the American Economic Association for his work in international trade and finance. He is recognized worldwide as a leader in the fields of economic geography and the role of increasing returns in shaping international trade.

Paul Krugman is a Professor of Economics and Distinguished Scholar at the Graduate Center's Luxembourg Income Study Center at City University of New York (CUNY). Previously he was professor of economics at Princeton University.

He was chosen as one of Bloomberg's 50 Most Influential People in Global Finance, 2011. He has been honored to be one of *Foreign Policy's* Top 100 Global Thinkers for four straight years (2009-2012).

Krugman the Economist

Paul Krugman won the **2008 Nobel Memorial Prize in Economic Sciences** for his groundbreaking work on international trade and economic geography. (Here is a description in his own words of the work for which he won the Prize.) He is the author or editor of 20 books and more than 200 papers in professional journals and edited volumes. Professor Krugman is one of the founders of the “new trade theory,” a major rethinking of the theory of international trade, for which he also received the John Bates Clark medal in 1991 from the American Economic Association, a prize given every two years to “that economist under forty who is adjudged to have made a significant contribution to economic knowledge.”
